To whom it may concern:

We have been in the business of interior swimming pool finish applications for over 18 years in the central Florida area and one of the largest interior swimming pool finish companies in the nation. We have searched for years for an easy to use product that would help with the dusting and scale/calcium build up on the interior finishes. Plastering over 3500 pools a year you need an easy to use reliable product that works with any finish from any manufacturer. We found it with the STARTUPTEC!

Over the past 18 months every pebble and pigmented/colored swimming pool finish we have applied has STARTUPTEC added to the initial fill water. We have just been overwhelmed with the results of the STARTUPTEC. Our service department has seen a drastic decline in scaling/calcium build up service calls. When your contractors and customers see the difference in the first 30 days of pool maintenance with less PH and ALK spikes, less brushing, and the pool looks like day one, you know you have a product that works.

Dennis Clark
Plastering Division
Operations Manager

A handwritten signature in blue ink, appearing to read "Dennis Clark", is written over the typed name.
