Synergy Technology For Pools, Spas, And Fountains

Protec™ Water Treatment

Advanced Synergy Keeps Surfaces Scale-Free And Looking New

Protec® now makes it easy to keep indoor-outdoor decorative fountains, birdbaths and water garden surfaces free from white mineral deposits and metallic stains without costly distilled water or harsh chemicals. Protec also prevents pump damage due to hard water buildup on pump screen and moving parts.

Protec's strong synergy formula easily and safely maintains water feature beauty by keeping surfaces continuously clean and looking new. With Protec, the use of harsh cleaning agents and laborious cleaning is avoided.

1. SYNERGY TECHNOLOGY:

Advanced synergy formula utilizes a unique blend of advanced enviro-safe phosphonates that enable Protec to provide superior and long lasting protection. Protec was especially developed to treat a variety of waters ranging from low to extremely high hardness.

2. GREAT VALUE:

Protec's eight-ounce bottle provides complete protection to treat an average size fountain for one full year. With its low treatment cost; plus considering savings in cleanup chemicals, time saved and distilled water eliminated, Protec is truly an outstanding value.

3. EASY & SAFE TO USE:

Simply determine proper dosage for your fountain size and add directly to water - no other testing or chemicals are routinely required. A single, ready-to-use treatment application of Protec last a full three months.

Protec® offers complete protection to maintain the beauty and appearance of water features ensuring years of trouble-free maintenance.
