Synergy Technology For Pools, Spas, And Fountains

Scaletec Plus® Provides Total Pool Restoration Alternative (to Hazardous Acid Washing and Cost Mechanical Tile Cleaning)

Background:

Conventional acid washing of pool surfaces and mechanical tile cleaning has been employed for decades to remove calcium scale buildup on surfaces. The problem with these methods are potential damage to surface and tile due to harsh acids and cleaning methods.

New Technology:

With the development of Scaletec Plus® which utilizes high performance descalers proven in the water treatment industry, it is now possible to descale an entire swimming pool with minimal or no acids or other cleaning methods. Even older, more difficult scales and stains also benefit from pre-treatment with Scaletec Plus.® Usually these pools will require lower acid strengths, less scrubbing, less cleaning fumes, and less potential surface damage.

Scaletec Plus® Advantages:

Scaletec Plus® removes the same calcium scales, mineral deposits, and most metal stains as acid washing *and is much safer to handle.*

Scaletec Plus® descales pool plumbing, heater, filter unit, pool vac, all valves, auto-filler, solar unit, PLUS salt chlorinator cell *and acid washing will not.*

Scaletec Plus® will not etch, discolor, or damage pool surfaces; however, *strong acid washing can.*

Scaletec Plus® is non-hazardous, safe to handle and non-toxic, *whereas acids are.*

Scaletec Plus® will not pit or damage waterline tile, *strong acid washing can.*

Scaletec Plus® does not require draining the pool, *strong acid washing does.*

Scaletec Plus® descalers do not require any special equipment or added liability, *acid washing does.*

Scaletec Plus® will continue to remove scale and stains when applied monthly, *an acid wash will not.*

New Approach

If you are looking for a better and safer way to remove scale buildup on pool surfaces, it is now possible with Scaletec Plus offers. It only requires 1 or 2 bottles most pools. You see visible and significant descaling action within 2 to 4 weeks. You can now give your customers a choice and even perform several cleanups at the same time.
